(+63) 917 637 2010
8471 Maharlika Avenue, Marcelo Green Village Phase 5, Parañaque City

## EDUCATION

**MSc Bioinformatics**, The University of Edinburgh 2022-2023
***Master of Science with Merit***

**BSc Genetics and Microbiology with a Year in Industry**, The University of Sheffield 2018-2022
***Upper Second Class Honours (2:1)***

## SKILLS

| | |
|---|---|
| **Technical Skills (Writing)** | Copy editing, Proofreading, Mendeley (Reference Management), Medical Education Writing |
| **Technical Skills (Bioinformatics)** | R, SAS, Python, Bash, P21, Certara's Phoenix, PyMol Linear Regression Models (R), Bayesian Statistics (R) |
| **Soft Skills** | Adaptability, Detailed and Critical Thinking, Teamwork, Leadership |

## EXPERIENCE

**Associate, Statistical Data Scientist** Dec 2025 - Ongoing
Pfizer Inc. *Hybrid, Makati, Philippines*

- Programming in SAS and R to produce and/or QC SDTM/ADaM/TLFs deliverables in therapeutic areas including immunology and inflammation, metabolic diseases, and oncology.
- Deliverables include both non-standard TLFs and CDISC-standard TLFs (SDTM IG v3.4). Have supported six studies so far across multiple therapeutic areas and submitted deliverables on time, including production of aDRG.
- Recently assigned as a specialised PK/PD statistical programmer to produce POPPK, PKECG, PK/PD, Safety, and Efficacy data files.

**Associate Content Editor** Jul 2025 - Nov 2025
Cambridge University Press & Assessment *Hybrid, Makati, Philippines*

- Creating captions and transcriptions with descriptive text for courses/promotional materials.
- Proofreading digital content packs (DCPs) according to in-house stylistic guides; correcting references and alt text in Canvas modules. Presented (statistical) findings on current alt text in courses and offering possible solutions toward reducing word count to make images more accessible to users with screen readers.
- Assigned to focus on science-related courses/modules (e.g., physiology).

**Copy Editor** Dec 2023 - Jun 2025
Siliconchips Services Ltd. *Remote*

- Freelance copy editor; editing and proofreading articles before their publication in open-access journals.
- Currently have edited articles to be published for the Annals of Global Health (AGH), the Journal of Long-Term Care (JLTC), the Journal of Technology Studies, and the British and Irish Orthoptic Journal.
- Correcting references in AMA, Harvard, Chicago, and Vancouver reference styles.

**Medical Writer Intern** Jan 2024 - June 2024
Klarity Health *Remote*

- Weekly writing of articles derived from medical research aimed at the layman audience.
- Link to my currently published articles

**Clinical Pharmacology Placement Student** Sep 2020 - Sep 2021
Roche Products Ltd. *Welwyn Garden City, England*

- Used various software such as Certara's Phoenix platform and R Studio to perform NCA analyses on four oncology drugs in their early trials. Presented and validated outputs to members of the Clinical Pharmacology team.
- Created graphical outputs (data visualisation) for studies in Phoenix. Retrieved relevant information from protocols to validate pharmacokinetic data.
- Used iMedidata's RAVE EDC system to determine data inconsistencies and advised the project team of these matters.

## PROJECTS

**MSc Dissertation: "Development of a Web Application for Computational-Protein Design"**
Used Python, StreamLit and Elm to produce a web application that is accessible to researchers by combining tools in development (TIMED-Design and DE-STRESS); creating a pipeline that both designs protein-sequences and evaluates their metrics.

**BSc Project Report: "Illumina read simulation to assess software packages for structural variant detection in bacterial genomes with Python" (Achieved First Class Mark)**
Used an Illumina short read sequencing simulator followed by software packages: DELLY, LUMPY, Wham, and breseq. Python and Bash scripts were created to apply structural variations (SVs) to the Clostridium botulinum A Hall genome. The accuracy of the software packages was analysed by comparing the recorded SVs in the Python script versus the predicted SVs from the packages.

## EXTRA-CURRICULAR ACTIVITIES

- **MSc Bioinformatics Programme Representative.** Attended Student-Staff Liaison Committee meetings (SSLCs), providing feedback gathered from students. Met directly with programme directors on issues students are facing and relaying questions students want to ask anonymously.

## VOLUNTEERING

**Number Heroes Volunteer** 2022
University of Sheffield *Sheffield, England*
Assisted teachers in Abbeyfield Primary Academy; provided additional support to students who were disadvantaged in maths (from less developed areas in Sheffield).

**Resource Creator for Beards and Books (Maths)** 2021-2022
University of Sheffield *Sheffield, England*
Created maths homework for students to support and help them improve their numeracy skills.

**Computer Club Volunteer** 2019-2020
University of Sheffield *Sheffield, England*
Helped children with Autism learn and use computers, socialising and playing games with them.

## CERTIFICATIONS AND OTHER TRAININGS

**Noncompartmental Data Analysis using Phoenix WinNonlin - Certara University, 2020**

**edX Verified Certificate for Quantitative Methods for Biology - edX, 2020**
